About Me

Lead UI Developer skilled in modernizing front-end interfaces and delivering seamless user experiences through scalable solutions.

SKILLS SUMMARY

HTML5, CSS, CSS3, SCSS, Bootstrap, Javascript, Typescript, Angular 1.x, Angular 17, RxJS, Nx, NgXs, Microfrontends, Web components

EXPERIENCE

**Morgan Stanley, Bangalore
Senior Manager (Lead UI Engineer)
July 2021 - Present**

- Led the Angular migration (from AngularJS to Angular 17) using a web component strategy, significantly modernizing the application.
- Developed and productionized a support project from scratch to address admin tasks and business challenges, requiring a deep understanding of morganized systems.
- Led the migration of repositories from Bitbucket to GitHub and facilitated the onboarding of GitHub Copilot for the UI squad.
- Conducted UI chapter calls to align strategies and best practices for Angular migration across teams.
- Organized and managed JIRA work by creating user stories, conducting backlog grooming sessions, and facilitating daily stand-ups and retrospectives.
- Collaborated with project stakeholders to gather requirements and ensured their implementation through team efforts, leading to successful, seamless go-lives.
- Provided mentorship to junior developers, resolving UI-related issues and clearing blockers, while closely monitoring pull requests and offering constructive feedback.
- Conducted mainline releases and patch releases, ensuring timely and coordinated production updates.
- Built innovative features like release notifications, enhancing project communication and transparency for stakeholders and team members.
- Active production support for all production bugs, directly communicating with users to understand the issues and promptly resolving their queries.
- Quickly understood Cypress and implemented Test Automation across various pages.
- Served as a seasoned JavaScript trainer for Spring and Summer internships, fostering new talent and enhancing their technical skills.
- Conducted various tech showcases highlighting the latest initiatives and innovations within the squad, promoting best practices and knowledge sharing across the organization.

JP Morgan Chase & Co, Bangalore
Associate Vice President
Aug 2018 - July 2021

- Created responsive front end for the website for different devices like desktop, tablets and mobile. Bootstrap3, CSS3, HTML5, Angular4, and Sass were used here.
- Worked on creating different customized component like table, tab-set, errormessage, accordion, pop-up, upload-document-component etc.
- Migrating different modules from angular 1.x to Angular 5.
- Hosting our application on connect (Tick 42) platform.
- Worked on configuring different chunk modules that can be served on demand.
- Worked on migrating account opening platform to micro front-end architecture.

United Health Group, Bangalore
Sr. Software Engineer
Nov 2016 - July 2018

- Created responsive front end for the website for different devices like desktop, tablets and mobile.
- Worked on creating shared modules that can be used everywhere in project.
- Did new-relic integration.
- Setting up authentication strategy n UI layer.
- Worked with CI/CD people to deploy the application on was.
- Worked on different angular component like Error-Message component, Notification component, Progress-bar component etc.
- Worked on JEST | Jasmine test cases and fixing sonar issues.
- Configured the UI Layer to support different environment.
- Creating React component to build the interactive UI. We also used different type of external React plugin like react-progress bar, react-scrollbar etc.

Mindfire Solutions, Bangalore
Sr. Software Engineer
Aug 2013- Nov 2016

- Created Responsive Layout for the website by using Bootstrap3, HTML5, CSS3, jQuery, Angular JS. We also used plugin like Spectrum Color picker, MarkDownHelper, JS Minifier. We also use tool like Gridify, WhatFont, Pendule, Visual event, Web Developer Add ons.
- Writing back end procedure using ASP.NET C#, LINQ, Entity Framework, WEB API, SQL SERVER.
- Replacing old jQuery pop-ups with bootstrap responsive modal pop-ups.
- Worked on jQuery plugin like Image Mapster, PinchZoomer etc. Also used font awesome in our project to use icons instead of having images. We also used font tello later on to make Customized package of fonts
